## PRESIDENT'S LETTER

*By Rob Lloyd*

Hello everyone, I Would like to take this time to thank our past president Ted Atwood for stepping up and keeping our Social Club up and running. Ted has guided our new Officers and Board members into a new chapter. It's been a rough year with trying to come up with Covid safe events. Our Social Club officers and board members are dedicated to bringing all of us together and to continue having events throughout the year. Please take a look in the Domei and recognize your new Social Club officers and board members. We look forward to a fun filled year of events. So, bring your suggestions to any one of us and we will do our best to make it happen. We are dedicated to keeping the Bayside Social Club as active as possible. Together we can make this happen!!

Respectfully, Rob Lloyd

## WE CARE

*By Dorothy Ravener*

Deepest Sympathies were sent to Joanne and David Cross on the passing of her Mother Ruth Bourdelais on Feb 20th. Ruth was 104 years young. Ruth came to many dinners and she even participated in the Christmas Golf Parade. Rest in peace. Get Well wishes for Noreen Adams

## KOFFEE KLATCH

*By Sandy Rassmussen*

Thanks to Mark Rassmussen who still gets up at 5am and meets Henry from Sunshine Bakery to get Saturday morning donuts. We are currently meeting down at the Bay at 8-9 am watching the beautiful sunrise, or by the Laundry room during wet weather. We have had a few birthday parties, when donuts are free, or there is \$1.00 for donut and coffee. We will continue to adhere to social distancing and facemasks for every ones protection.

## WELCOME WAGON

By Sandy Rassmussen

---

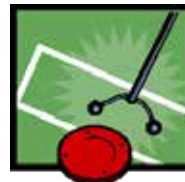

**W**ELCOME WAGON- As in the past, we will be serving Marks burnt hotdogs, chips and watermelon. Please tell your neighbors and bring your new neighbors, all are welcome, this is a free event monthly. **ALWAYS THE LAST WEDNESDAY OF THE MONTH** at 5:00 to 7:00pm. Look forward to upcoming list of presenters and goodies. Any questions please feel free to contact Welcome Wagon Lady Sandy Rassmussen. Face mask and social distance required.

## SHUFFLEBOARD

By Sandy Rassmussen

---

**A**gain Shuffleboard games, 5-7 pm. The time change is because of no lights. There are easy rules to follow, come and have some fun on Tuesday evenings. If anyone is interested in refereeing please let Mark or Sandy Rassmussen know. You do not need to know how to play, come and let us teach you. It's a great sport to know when your family comes to visit. It's very easy to learn and to do physically. Face masks and social distance required.

## UPCOMING EVENTS

---

April 10 Flashback Band will be playing 6-9pm

April 22 Corn hole 3-5pm.

## CORN HOLE

---

**I**f you are interested in learning or already know how to play, they have been playing on Saturday afternoon once a month at 3:00pm. There was talk of playing on another day so check with Ted Atwood. Face masks and social distance required.

## BOWLING

---

**B**owling has stopped for the year. We have a great bunch of players and have a great time. Hopefully we will start again in the fall. I hope next year is kinder to us. There is a bunch that plays during the week, so if you are thinking of joining us in the fall then this is a good time to practice. Have a great summer.

## Upcoming Trips

*By Florance Miller*

---

**O**k, who's itching to plan a trip. Me, me, me!  
St. Augustine Nights of Lights - December 8-10, 2021  
This is a trip to St. Augustine, Florida by bus provided by a travel company called Tours 4 You. Many of us went to Key West with this company and had such a good time we were going to take in the St. Augustine Nights of Lights in 2020.

Our trip was, unfortunately, sidelined due to COVID-19, but are we going to give up? Of course not!!!

I will post a flyer on the bulletin board. If you would like to go, please contact me and sign up by providing a deposit check of \$100 per person. Cost is \$239 per person, double occupancy. We are going to have fun again.

## Mysteries of the largest black hole

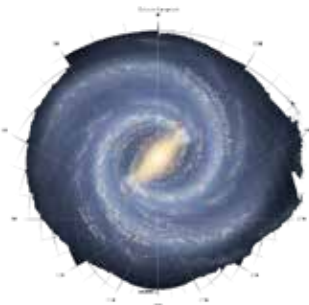

**I**t's the biggest and oldest black hole ever discovered. And it's nowhere near close to giving up all its secrets, according to the Science News website.

The black hole, J0313-1806, has a mass equal to 1.6 billion suns. It's at the center of a galaxy more than 1.3 billion light-years from Earth, and it comes from a time when the universe was only 670 billion years old—about five percent of its age now.

How did it get so large? That's the mystery. Supermassive black holes—also known as quasars—are typically thought to grow from smaller black holes pulling in matter. However, astronomers estimate that if this quasar formed right after the universe's oldest stars and grew as fast as possible, it would have needed to start out with at least 10,000 times the mass of the sun. Collapsing stars that form black holes, though are thought to only create quasars around a few thousand times the mass of our sun.

Scientists theorize that a huge black hole could have formed from the collapse of primordial hydrogen gas in vast amounts. On the other hand, this black hole could have been produced by stellar collapse and grown more quickly than previously thought.

Which explanation is correct? Scientists will have to look further back through time toward the birth of the universe for smaller black holes and measure how they grow.

## Yikes! Electric eels hunt in packs

Imagine fleeing from an electric eel. Pretty scary, right? Now imagine trying to escape a pack of them.

It's not a horror movie (yet). But The New York Times reports that scientists have discovered that eels, long considered to be loners of the deep, actually congregate in packs to hunt other fish. The behavior was actually first observed in 2013, when a Brazilian diver exploring an Amazon waterway came upon a “writhing mass” of 100 or more eels ganging up to prey on a group of tetra fish. The eels nudged them into tight balls and then hit them with a series of synchronized shocks.

The discovery was confirmed by other researchers and recently written up in a scientific journal. The eels have been identified as the Volta electric eel, which can grow to eight feet long and deliver a shock of 860 volts. Ten of them working together could produce enough electricity to power 100 light bulbs. Researchers speculate that they coordinate their attacks by communicating with low-voltage energy discharges.

*The aim of science is to seek the simplest explanations of complex facts.
