## Believe in yourself

---

The night before Douglas MacArthur took the entrance exam for West Point, he was very nervous. At the time, his mother offered him some sage advice. She told her son not to lose his nerve and that he needed to believe in himself, because if he didn't no one else would either. She also told her son that even if he failed, he would succeed in knowing that he had done his best. With this bit of wisdom MacArthur tackled the exam — and when the results came back he finished in the No. 1 slot. — adapted from *The Speaker's Library of Business Stories, Anecdotes and Humor* by Joe Griffith

## A problem-solving legend

---

In 333 B.C., the famous Macedonian general Alexander and his army arrived in Phrygia to spend the winter. According to Greek legend, a farmer named Gordius became king of Phrygia by fulfilling a prediction made by an oracle that the next king of the country would ride into the public square on an oxcart. In gratitude, Gordius tied his cart in the temple of the oracle's god, using a knot so intricate that no one was able to untie it, though many tried. A legend arose that whoever untied the "Gordian Knot" would rule Asia.

When Alexander the Great encountered the challenge of the Gordian Knot, he was fascinated. He studied the problem.

Finally, in a burst of inspiration (or was it frustration), Alexander pulled out his sword and sliced the knot in half, solving the complex problem with a simple solution and becoming part of the legend himself. He and his armies went on to capture and rule more territories in the ancient world than anyone who had gone before him. This included Asia, although in Alexander's day that extended only as far as India.

Sometimes, the best way to solve a difficult problem is to slice away some of the complexities with a single stroke, despite opposition and advice to do otherwise. — adapted from IdeaBank

# How Mickey Mouse was born

The legacy of Walt Disney is now a \$20 billion media giant. It includes film studios, TV networks, publishing houses, famous theme parks and hundreds of retail stores.

Disney was the last of five children born in 1901 to parents who lived in Chicago. Disney became enamored with drawing and started a company with his brother Roy to try and build an animation business. Disney was barely making it financially.

On a long train ride back from a disastrous business setback in which he lost the rights to a character he had created, the idea came to Disney to create another character based on a mouse that scampered across his drawing board. This idea blossomed into the character of Mickey Mouse.

Later, when Disney spent an unprecedented \$1.5 million to produce the masterpiece Snow White, critics and naysayers dubbed the project “Disney’s Folly.” However, the animated film became the most profitable ever released and set Disney on the path of creating animated classics, and he became known as the father of the animated-film genre. — adapted from the Los Angeles Times article “50 people who most influenced business this century”

## Treating bee stings

**B**ee stings can be extremely dangerous if you are allergic. So if you are and you get stung, go immediately to the hospital.

If you do not have an allergy, then you can treat most bee stings yourself.

Remember, if you are stung you should scrape the stinger out. You can do this using a credit card, the side of a knife blade or the edge of a long fingernail. Never try to pull the stinger straight out.

You can neutralize some of the swelling that occurs because of inflammatory agents in the venom by rubbing a wet aspirin directly on the sting. However, if you can't take aspirin normally, you should not use it for bee stings either.

Taking an antihistamine can ease pain and swelling for adults. For children, cough syrups that contain antihistamines work better. — *adapted from Tyco Wellness*

## How to avoid blisters on your feet

**I**f you are a walker, you have probably had a few blisters on your feet. The faster you walk the more likely that you will sweat and perspire — and moisture is what makes blisters occur. Here are a few tips to avoid blisters.

- Before setting out on your walk, swab your feet with rubbing alcohol. The alcohol is a drying agent and will help control sweating. Make sure your feet are completely dry after you swab them before you put on your socks and shoes.
- Well-fitting shoes and socks that are made to absorb moisture also help reduce the occurrence of blisters.
- Take an extra pair of socks with you, and when your feet feel like they're getting wet, stop and put the dry pair on.

- Save the whales. Collect the whole set.
- A day without sunshine is like, night.
- On the other hand, you have different fingers.

- I drive way too fast to worry about cholesterol.
- Support bacteria. They're the only culture some people have.
- Monday is an awful way to spend 1/7 of your week.
- A clear conscience is usually the sign of a bad memory.
- Change is inevitable, except from vending machines.
- Get a new car for your spouse. It'll be a great trade!
- Plan to be spontaneous tomorrow.
- Always try to be modest, and be proud of it!
- If you think nobody cares, try missing a couple of payments.
- How many of you believe in telekinesis? Raise my hand ...

## How to plant a great herb garden

If you love having fresh herbs at your fingertips here are a few suggestions on setting up a herb garden you will use and love.

- Plant your herb garden as close to the kitchen as you can manage. Your herb garden can be grown in a series of containers if that helps you locate it where it will be most convenient. If you have to go to too much trouble to get to and pick the herbs, you won't use them as much.
- If you want to get the most pleasure you can from your herbs, plant them along walkways and where people will brush up against them. They won't release their fragrances until something brushes or bruises them.
- Make sure to place your marjoram, parsley and thyme along borders. These plants only grow a few inches high and they will get lost among taller plants.
- Dill, tarragon and coriander grow up to 2 feet high. If you have a walkaround garden, the center is the best place. If your garden is up against a wall or object then you will want to place these plants at the back of the garden.
- Grow bay leaves and rosemary in clay pots just beneath the soil of your garden. When the weather turns cold, just dig them up and take them inside. They will continue to grow and you can enjoy their fragrance and flavor year round.
- Remember some herbs spread (like mint, wild marjoram and tarragon). Each year they will take more and more room. To contain their growth, confine their roots by burying a section of stovepipe. The pipe will keep them from spreading.
- Cut your herbs just before they flower for optimum flavor. That's when their oils peak. If you're going to store your herbs, it's best to cut them midmorning on a sunny day.
- Store your herbs by freezing or drying or in oil or vinegar. You can use the oil and vinegar as seasonings when you cook.
- If you have refrigerator space, keep your dried herbs there, as they will keep better.
