## On the fragility of opinions

A very long time ago, far away in another land, there lived six blind men. They had all been blind since birth. Mostly, the six spent their days sitting around inventing tall tales to see who could tell the best story.

One day, the six men fell into a great argument. The subject of their argument was the elephant. There were many tales throughout the land about the great elephant, but because none of the men had actually seen an elephant each of them had their own idea of what the beast was like.

The men hired a young guide to lead them in finding an elephant to settle the dispute. The blind men followed along, each one placing his hands on the back of the man in front of him, and in this way they made their way single file along a narrow forest path.

It wasn't long before the group came across a great elephant. The six became very excited. They decided that each man should take a turn at exploring the elephant's shape and form.

The first man fell against the side of the elephant and said, "My, the elephant is like a great and sturdy wall."

The second man grabbed hold of the tusk of the elephant and said, "My, the elephant is smooth and sharp, like a wonderful spear."

The third man approached the animal and grabbed on to the trunk and said, "My, the elephant is exactly like a snake."

The fourth man grabbed hold of the elephant's great leg and said, "My, the elephant is round and sturdy, just like a tree."

The fifth man reached out and grabbed hold of the elephant's ear, "My," he cried out, "The elephant is just like a fan."

The sixth man reached out and grasped upon the elephant's tail and said, "My, the elephant is exactly like a rope."

And so, the men continued arguing, even more loudly than before, each arguing for his opinion of what the elephant was like. And even though each was a little right—all of the men were more than a little wrong.

## The most important ingredient

It was well known that Abraham Lincoln often slipped out of the White House on Wednesday nights to listen to the sermons of Phineas Gurley at New York Avenue Presbyterian Church. The president tried to slip in and out of the services unnoticed—so Gurley often left his study door open so the president could listen to his sermons privately. One night, Lincoln showed up and took his seat in the minister’s study and propped the door open a little wider so that he could hear what the preacher was saying.

An aide later asked Lincoln what he had thought of the most recent Wednesday night sermon.

The president thought for a moment and then replied: “The content was excellent ... he delivered with eloquence ... he put work into the message ...”

“Then you thought it was an excellent sermon?” the aide asked.

“No,” Lincoln answered plainly.

“But you said the content was excellent ... that it was delivered with eloquence and it was the fruit of hard work,” the aide said.

“That’s true,” Lincoln said. “But Dr. Gurley forgot the most important ingredient ... He forgot to ask us to do something great.”

## A stone in the road

Once in a foreign land, a king had a boulder placed in the middle of a well-traveled road. Then the king hid himself from view, and watched to see what would happen.

Wealthy merchants whom the king knew well saw the boulder and stepped around it. Courtiers came and when they saw the boulder they walked around it as well.

It came to pass that many people criticized the king for not keeping the road clear, but no one in the kingdom did anything to get the giant stone out of the road.

One day, a peasant came down the road carrying a load of vegetables. When the man saw the stone, he laid down his load and commenced in trying to move the stone. After a great effort, the peasant finally was able to move the boulder. When the peasant went back to the road for his vegetables he noticed that in the place where the stone had been was a beautiful red purse. The peasant picked up the purse and saw that it was filled with many gold coins and a note from the king saying the gold was for the person who moved the boulder from the road.

Moral: What other men see as an obstacle can be an opportunity for the man who faces it head on.

### *On success*

*Most people search high and wide for the keys to success. If they only knew, the key to their dreams lies within.*

*— George Washington Carver*

## Einstein in ‘Tinsel Town’

In his book *Great Hollywood Wit*, famed movie critic Gene Shalit recounts this famous Hollywood anecdote. Albert Einstein once ventured into the alternate universe known as Hollywood. Many celebrities made it their business to get invited to the sumptuous bash thrown in the physicist’s honor. No doubt many at the star-studded event had heard of his theory of relativity—but it’s unlikely that many understood it. At the party, it came to pass that one of the 20th century’s greatest minds was introduced to Jack Warner, a movie producer who ruled Hollywood for many years. Warner’s studio was responsible for introducing stars like Bette Davis, Humphrey Bogart—and Bugs Bunny. When Einstein was introduced to Warner, the movie maker said, “I have my own theory of relatives. Don’t hire ’em.”

## Things you’ll never hear your consultant say:

- You’re right; we’re billing you way too much for this.
- How about you only pay me based on the success of this project.
- The whole strategy is based on a Harvard business case I read the other night.
- I don’t know enough about that to speak about it intelligently.
- Implementation? I was just going to write a long report for you.
- The only real problem you have is too much work for too few people.
- Everything looks OK to me. You really don’t need me.

## No future in it

**J**ohn: “I don’t think Steve is going to make it as a speaker.” **E**d: “Why?” John: “Because yesterday, when he asked if they could hear him in the back, and the answer was no, everyone in the front moved to the back.”

*There are no secrets to success. Don’t waste time looking for them. Success is the result of perfection, hard work, learning from failure, loyalty to those for whom you work, and persistence.*

The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. ## Reduce your food label confusion

Are you confused by the labels on food products in the grocery store? Products now like to advertise that they are “fat free,” “reduced fat” and “low calorie.” So what do those terms really mean? The Food and Drug Administration regulates what foods can contain before they can make label claims. Here are a few FDA label-claims requirements for food manufacturers:

**Free.** This means that a product contains no amount of, or only trivial or “physiologically inconsequential” amounts of one or more of the following components: fat, saturated fat, cholesterol, sodium, sugars and calories. For example, “calorie-free” means fewer than 5 calories per serving, and “sugar-free” and “fat-free” both mean less than 0.5 grams per serving. Synonyms for “free” include “without,” “no” and “zero.” A synonym for fat-free milk is “skim.”

**Low.** This term can be used on foods that can be eaten frequently without exceeding dietary guidelines for one or more of these components: fat, saturated fat, cholesterol, sodium and calories. Thus, descriptors are as follows:

- Low-fat. 3 grams or less per serving.
- Low-saturated fat. 1 gram or less per serving.
- Low-sodium. 140 milligrams or less per serving.
- Very low sodium. 35 milligrams or less per serving.
- Low cholesterol. 20 milligrams or less and 2 grams or less of saturated fat per serving.
- Low calorie. 40 calories or less per serving.

Synonyms for low are “little,” “few,” “low source of” and “contains a small amount of.”

## Many Americans suffer from heartburn

According to the AstraZeneca Web site, heartburn is a burning feeling that rises from the stomach or lower chest up toward the neck. The burning sensation is caused by acid that backs up from the stomach into the gullet (esophagus). Usually a valve at the lower end of the esophagus opens when you swallow and closes when the food has passed. However, in some people, this function does not work properly and does not close off when it should—after a meal, for instance. Anyone who suspects they are suffering from heart-burn should seek a doctor’s advice; medicine may be required and more serious problems need to be eliminated as the cause of the discomfort.

- In Western countries, about 40 percent (two in every five) of adults suffer from heartburn.
- Up to 44 percent of American adults suffer from heartburn at least once a month, and approximately 7 percent of Americans experience heartburn at least once a day.
- Twenty-five percent (one in four) of pregnant women experience daily heartburn and more than 50 percent have occasional symptoms.

## Attention worrywarts - you can change

If you're human, you worry. And worrying has served a great purpose for humankind—the process has been an integral part of evolution and survival for thousands of years. Let's face it, compared to, say a T. rex, human beings were not the most likely creatures to survive long term—so what happened? We worried. Or in other words, we were able to exercise forethought—project the possibilities of what might happen in the future in our minds and then make decisions based on the “what if...” scenario. And it helped. If a caveman saw a friend eat a berry and then fall down dead, he would be able to think “Gee, my friend, died after eating a purple berry.” And weeks later when he found a bush full of purple berries that looked like the ones his friend ate, he would make the informed and rational decision to avoid putting one in his mouth. In essence, he worried about something before he did it—and he survived.

But like all good things, sometimes our evolutionary gold-mines go awry and end up with negative consequences if they are allowed to run amok. And that, in essence, seems to be happening to a lot of people today. People seem to be experiencing overwhelming levels of worry and the condition is being tagged as generalized anxiety disorder. Psychologists seem to think that people are experiencing GAD more often these days because modern life is full of so much stress. According to the American Institute of Cognitive Therapy, people react to this stress in different ways: Some people believe that if they worry, they are somehow protecting and preparing themselves; some believe that they need certainty in order to relax; and some believe that worrying about worrying is going to drive them crazy.

So what's a worrywart to do? According to NetDoctor.co.uk, cognitive therapy can help those stricken with GAD. This involves analyzing your response to the world, and learning how to think and act in new ways. Physical exercise and deep breathing is also very helpful for most sufferers.

Dr. Robert Leahy, author of *The Worry Cure*, says there are ways to stop excessive worry, “It takes practice and patience,” Leahy says, “but ultimately it boils down to readjusting how you think about the world, and really believing that tomorrow is more likely to bring you something humdrum or wonderful than something frightening.”

### *On perseverance*

*There are pearls in the deep sea, but one must hazard all to find them. If diving once does not bring you pearls, you need not therefore conclude that the sea is without them. Dive again and again. You are sure to be rewarded in the end.... If your first attempt proves fruitless, do not lose heart. Persevere in your efforts....*
