Did you know that February is also...

Black History Month. This monthlong celebration of the accomplishments of African Americans throughout history began in the early 20th century as a result of the efforts of Dr. Carter G. Woodson and the organization he founded, The Association for the Study of African American Life and History.

National Children's Dental Health Month. Highlighting the practices and benefits of good oral hygiene and their effect on health and well-being. The theme of the American Dental Association's 2018 campaign is, "Brush your teeth with fluoride and clean between your teeth for a healthy smile."

Creative Romance Month. Not big on candy and flowers? Plan the perfect rendezvous with your valentine. Consider an overnight stay at a bed and breakfast, a day hike at a scenic location, or a romantic movie marathon. Let love inspire your imagination to express what's in your heart.

Great American Pie Month. What better way to spread love and happiness than with a freshly baked pie? It doesn't matter if it's sweet or savory. If February has you snowed in, you've got plenty of time to perfect your crust-making and lattice-weaving skills.

Burn Awareness Week, Feb. 4-10. The American Burn Association devotes the first full week of the month to raising awareness and education about safety issues in an effort to prevent burns.

International Networking Week, Feb. 5-9. The first business week of February is a time for members of businesses, communities, and governments to meet, exchange ideas, and forge partnerships.

National "Wear Red" Day for Women's Heart Health, Feb. 5. Heart disease is the No. 1 killer of women in United States. Raise awareness of heart health issues and disease prevention by wearing something red on this day.

World Radio Day Feb. 13. Before social media, podcasts, or cable television, families gathered around the radio to listen to news of the world, popular music, and radio plays. This day marks the anniversary of the United Nations international broadcasting service established in 1946.

National Tell a Fairy Tale Day, Feb. 26. Some have morals that help guide our actions and others are filled with magic where goodness triumphs. Reread a classic, share your favorite with a group, or discover a new one on this day.

Interstellar asteroid is a first

Asteroids can be found throughout our solar system, but astronomers have recently discovered one in interstellar space. The Science News website reports that the object, first believed to be a comet, is approaching the solar system at an unusually steep angle. Dubbed A/2017 U1, the asteroid is about 400 meters across and traveling 25.5 kilometers per second on a slingshot path past the sun. Astronomers plan to measure the colors in its reflected light to determine what it's made of and seek clues to its origins.

Red sky in Asia mystery solved

It's a centuries-old mystery: In the year 1770, skies over Asia turned a bright red for nine days. The cause of this unusual phenomenon has never been identified. Now, though, scientists believe they have an answer.

As reported on the Slate website, researchers recently uncovered a collection of 111 contemporaneous documents from that time, and learned that the red sky had lasted longer than previously thought (just two days) and was much larger as well.

Scientists' conclusion: The effect was created by an aurora caused by solar activity, sparking the longest geomagnetic storm in recorded history.

A similar aurora was observed on two nights in 1859 by a massive solar storm known as the "Carrington Flare." Analysis of records of sunspot activity in 1770 suggests that the Asian aurora was caused by sunspot twice as large as those that created the Carrington event.

If such an event happened today, it would likely have catastrophic effects, knocking out satellites crucial to communications and GPS instruments.

New mineral found on Martian surface

NASA has discovered evidence of an ironoxide mineral on the surface of Mars, the Science News website reports. The mineral, called hematite, was detected by spectral analysis of photos taken by the space agency's Curiosity rover in an area known as the Vera Rubin Ridge.

Curiosity zeroed in on a rock dubbed "Christmas Cove," and used its dust removal tool, a wire-bristled brush, to uncover an area some 2.5 inches across.

Observations made the rover's Mast Camera (Mastcam) and its Chemistry and Camera (ChemCam) confirmed the presence of the hematite, a mineral that may provide information about ancient environmental conditions on the red planet.

Can beet juice keep your brain young?

Beet juice may keep your brain young and fit, according to an article on the Runner's World website. The article cites a study reported in the *Journal of Gerontology: Medical Sciences* that found that a shot of beet juice an hour before exercise can have positive benefits to brains as they get older.

In the study, 26 sedentary men with an average age of 65 participated in six weeks of exercise. Some took daily shots of beet juice; others received a placebo. The participants walked on a treadmill three times a week for six weeks, building up to 50 minutes per session at increased effort. Comparing MRIs from before and after the trial, researchers found that the group that drank beet juice had significantly higher levels of "community consistency" within their brains.

The nitrate in beet juice, which converts to nitrite and then nitric oxide in the blood, has a strong positive affect on responsiveness in blood vessels, which in turn can increase the amount of oxygen reaching the brain and boost aspects of cognitive function.

Make sure drinking glasses are safe

Take a look in your kitchen cabinet at your drinking glasses. Do you have decorative glasses for water, wine, beer, or whatever you drink during the day? They may be hazardous to your health.

The Medline Plus website reports that researchers at the University of Plymouth in the United Kingdom analyzed more than 70 new and used drinking glasses and found that seven out of 10 tested positive for lead or cadmium—both toxic metals.

Lead was found in all colors and goldleaf designs. Cadmium was found in the highest concentrations in red enamel.

Lead in children's bodies can cause growth and developmental difficulties. Cadmium can cause cancer. Studies have also linked it to bone softening and kidney problems.

Keep deadly chemicals out of your body

The list of chemicals that can cause cancer is intimidating, and keeping them out of your food can seem like an impossible task. The Fox News website, though, offers these tips for keeping your food and water free of toxic chemicals:

- Buy a water filter. A good filter can remove many cancer-causing chemicals.
- Eat organic foods. You'll cut your exposure to pesticides and other chemicals and support an industry that doesn't pollute the environment.
- Bring your own mug. Foam cups from most coffee shops contain styrene, which gets pulled out when in contact with hot liquids. Take your own travel mug when you go out for coffee, tea, or other hot beverages.

VINYL IS FINAL

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word - the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"

Even cats get the blues

If the cold weather, lack of sunshine, and short days of February have you feeling out of sorts, imagine the havoc it's playing on the lives of our animal companions. Confined indoors and longing to feel the earth beneath their paws and a gentle breeze ruffling their fur, our pets can get depressed and a bit stir crazy this time of year.

Talk to your vet if you notice changes in your pet's eating, activity, and sleeping habits to rule out the possibility of an illness. Be on the lookout for an increase in destructive behaviors such as chewing and scratching that can be an indication of boredom or anxiety. The same holds true for repetitive behaviors such as excessive meowing or barking.

If your pets are otherwise healthy, a little extra attention may help to alleviate their winter doldrums. Introduce a new toy into the mix or add a few extra minutes of playtime to their daily routine to help them stay stimulated and active. Consider baking up a batch of natural dog biscuits or growing a patch of cat grass to give pets a treat that will show them that you're thinking of their well-being.

A tireless fighter for a cause

Born Feb. 15, 1820, Susan B. Anthony devoted her life to the fight for social justice and reform. She began her activism as a member of the American Anti-Slavery Society in the years leading up to the civil war. In 1866 she founded the American Equal Rights Association with Elizabeth Cady Stanton, and the pair embarked on a mission to secure civil liberties for all citizens regardless of their gender or race. This work would lead Anthony and Stanton to found the National Women's Suffrage Association, where they continued to advocate for women's voting rights.

Anthony died on March 13, 1906, 14 years before her work would be realized. In 1920, the 19th Amendment was added to the U. S. Constitution, giving women the right to vote. In 1979 the U.S. Treasury Department honored Anthony by placing her image on the dollar coin.

Happy Fat Tuesday

This year the revelry of the carnival season will culminate on Tuesday, Feb. 13, in celebrations around the world before the start of Lent.

In the United States, the city of New Orleans is the capital for all things Mardi Gras, which is French for "Fat Tuesday." Although the city has roots deeply centered in French heritage, it was not the first American city to host this event. French-Canadian explorer Pierre Le Moyne d'Iberville is rumored to have held the first Mardi Gras in a location about 60 miles downriver. Years later, settlers along with French soldiers would continue the practice by donning masks and enjoying festivities in the newly established town of Mobile, Alabama.
