## BINGO.....Mondays.....6:30pm

---

## BUNCO

## IMPORTANT REMINDERS!!

---

The auxiliary gravel park lot is not intended for long term parking, neither are the parking spaces at the clubhouse. On street parking should be cleared by 11:00PM.

This is for guests as well as residents.

Any questions call the Community Office (727)725-1811

## Three activities to ward off Alzheimer's

---

Alzheimer's disease may not have a cure, but experts believe some practices can help delay memory loss. Here's what you can do:

- Cognitive training. Crossword puzzles and other games can help, but try some different techniques. Do simple arithmetic in your head instead of relying on a calculator. Develop a new method for remembering what's on your shopping list. Train your brain to remember things in new ways and you'll keep it sharper.
- Control your blood pressure. Reducing high blood pressure with medication and weight loss not only cuts your risk of heart disease, but it can also ease stress on the delicate blood vessels in your brain— stress that can exacerbate memory loss and dementia.
- Exercise. Moderate aerobic exercise has many health benefits, including heading off symptoms associated with Alzheimer's. Try exercising for 30 minutes five days a week, or 50 minutes three times a week. You'll feel better and extend your cognitive health.

## Scientists search for life on the toughest planets

---

We think of life as viable only on planets orbiting stars like our sun, but scientists now speculate that it could evolve on worlds circling very different types of stars.

Stars called M dwarfs are the most common stars in our galaxy. Their harsh flares and gravitational grip on their innermost planets could interfere with the formation of liquid water, which is necessary for life. However, astronomers have spotted approximately 200 planets circling M dwarfs, and dozens are in the so-called habitable zone where liquid water could exist and temperatures aren't too extreme for the development of life.

Scientists are studying these strange new worlds in hopes of detecting conditions that might lead to life—although it will probably be very different from any life found on Earth.

## Find your creative style

---

Whatever you want to achieve on the job or in your life, you need creativity to do it. That doesn't mean you have to have the scientific genius of Einstein or the artistic vision of Georgia O'Keeffe. You can unleash your creative mind by finding your own creative style. Here's how entrepreneurial expert Esther de Charon de Saint Germain describes styles on The Huffington Post website:

- **Watchmakers.** Some people are highly structured and detail oriented. They like to polish their ideas until they're as close to perfect as possible.
- **Wave makers.** These folks are more intuitive. They don't dive into details, but think in big-picture concepts. They're apt to lose interest, though, once the hard work of hammering down their ideas starts.
- **Acrobats.** These thinkers can go both ways. They think outside of the box, but they're also able to hone their ideas into something practical. Try to be this kind of creator.

## Improve your brain with these tips

---

Do you want to think more clearly, experience more insight, and have more creative breakthroughs? Take a look at a few tasks (from the Inc. website) that you can put into practice today for a more productive and imaginative brain:

- Seek out new environments. Don't stay in your rut. Go to a concert by a band you've never heard of. Visit a museum you've never been to. Travel somewhere completely new. You'll shake up your mind and nudge it in new directions.
- Let your mind wander. Don't focus all the time. Give your mind permission to soar from time to time, just exploring anything that pops in. A relaxed mind is more open to new ideas and different ways of thinking.
- Have more fun. All work and no play makes ... well, you know the rest. Take time for fun. Play a new game, take up a fresh hobby, meet new people who share your interests and can introduce you to new ones. Playfulness can lead to great ideas.
- Stop multi-tasking. When you're working on a problem or an idea, put away all distractions and focus. If you're constantly shifting from one task to another, your brain will get tired, and you won't have the perspective you need to zero in on what you're looking for.

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word - the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"
