Health insurance decisions can be confusing due to endless coverage changes and many policy types. Fortunately, there is someone who can work diligently to help and without cost to you – Michael Crotts, owner of Best Plan Choice.

Through his own healthcare experience Mr. Crotts learned the value of good health coverage and quality medical care. He dedicates his agency to helping people with Medicare and Medicaid needs. You can visit the office to learn about Medicare plan options or he will come to your home.

Every year your Medicare health plan coverage changes even if you do not change plans. Also, new products are introduced and many offer benefits beyond original Medicare and/or Medicaid plans. Baby Boomers had completely different insurance products during their working years. The indemnity and major medical policies are no longer the only choice and often do not meet the financial needs of consumers today.

Don't waste time trying to figure it out. Michael will sit with you and review all of the documents, and answer all of your questions. Most importantly, he will conduct a needs analysis to determine your individual needs – if you expect a hospitalization, use certain medicines, or want benefit like dental or vision – everything is taken into consideration.

Best Plan Choice is there to help you make the right choice and is available long after the policy is written. This means helping with doctor changes, plan questions, annual review of your benefits, and of course taking great care of any friend or family member you refer. At Best Plan Choice clients become friends, and friends become clients.

Coldest place in the world

You may think it's cold where you live right now—if you're in the northern hemisphere, at least—but scientists have located the absolute coldest spot on Earth. No surprise—it's in Antarctica.

The National Geographic website reports that satellite data have identified an ice sheet in the middle of the southern continent with a temperature of minus 144 degrees Fahrenheit. This breaks the previous record for the chilliest place on the globe—minus 128 degrees, recorded in 1983 at the Russian Vostok Station close to the South Pole. At that low temperature, breathing itself is dangerous—more than a few breaths would make your lungs hemorrhage.

Chances are we won't find any colder places. Increases in greenhouse gases and water vapor in the air have scientists expecting a rise in temperatures across the Antarctic of three to four degrees in the coming years.

Next time around

A student spent a semester abroad to learn about life in a different culture. Each day he left the home of his host family to walk several miles to the school for his classes. Along the way he'd pass a river.

Seated near the bank of the river was an old man. He was there every morning and also in the evening, no matter the time. He was also there on the weekends, sitting and staring off into the horizon, not interested in the comings and goings of the world around him.

After several weeks, the student's curiosity got the better of him. He approached the man and initiated a conversation. Eventually, the student asked the man why he sat by the river all day long.

The man explained that he believed in reincarnation and that his soul had been reborn many times. He said that life was filled with many lessons and that one might be reborn and faced with the same lessons many times before ascending into a different life the next time around.

He went on to say that some lifetimes were good, others were not. "This life is neither beautiful nor challenging, nor interesting nor exciting," the man said to the student. "I'm content to sit out this one."

The high cost of health care surprises many

Have you ever opened a medical bill and been stunned by how much you owe? You're not alone. The EurekaAlert website reports that 57 percent of Americans adults have been surprised by a medical bill because they thought the services were covered by their insurance. Twenty percent of them say the costs were because their physician wasn't in their network.

The costs have different origins. The most common are for physician services (53 percent), laboratory tests (51 percent), health care facility charges (43 percent), imaging (35 percent), and prescription drugs (29 percent).

Life it is not just a series of calculations and a sum total of statistics; it's about experience, it's about participation, it is something more complex and more interesting than what is obvious.

—Daniel Libeskind

Alcohol a major contributor to deaths worldwide

A cold beer or a stiff drink may be relaxing, but according to a USA Today article, alcohol is associated with 2.8 million deaths a year, and was the seventh leading risk factor for premature death and disability in 2016.

As reported in a study written up in the medical journal The Lancet, researchers looked at almost 700 studies from around the world to investigate alcohol's health risks in 195 countries. Their findings included the fact that alcohol was associated with almost one in 10 deaths of people 15–49 years old, contributing to tuberculosis, car accidents, and self-injury. With people over 50, cancers were a leading cause of alcohol-related deaths—27 percent of deaths in women and 19 percent in men.

The study's lead author, Max Griswold of the Institute for Health Metrics and Evaluation at the University of Washington, advises: "If everyone cut their consumption in half, we could save a million lives globally."

THOUSANDS manufactured home residents have won over **\$145,600** since our contest began. It's simple to play ... when you patronize a current advertiser, ask for a Monthly Mania ticket (or a reasonable facsimile) and fill it out completely. Put the ticket in our Monthly Mania drop box in your community or **mail your paid receipt** to us at **Monthly Media • 220 Bahama St. • Venice, FL 34285**. That's all you do. At the end of the month the Publishers will pick up the tickets and hold a drawing. If your ticket is drawn, we mail you a check.
