## FROM THE BOARD OF DIRECTORS

---

**W**elcome back to all of our Winter residents it's always good to see you.

A couple of reminders. One is to all pet owners. Please, be diligent about picking up after your pets. We've had problems in the common areas and several residents have had problems on their lawns, many of whom don't even have pets.

The other is to watch your speed in your automobiles and in your golf carts. Also anyone driving a golf cart in Glenwood must be 16 years of age. Refer to page 9 of your Rules & Regulations VEHICLES/UNREGISTERED. It states:

1. Golf Carts must be operated by persons 16 or older.
2. Proof of liability insurance for unregistered vehicles is required.
3. Rules of driving registered vehicles apply to other vehicles.
4. All rules for parking registered vehicles apply to all other vehicles.
5. No golf carts or bikes on sidewalks. Sidewalks are for pedestrians only.

## A GREAT BIG THANK YOU

*Shirl McAra*

---

**T**his would be a good time to say thanks to our Social Committee President, Janet Green and all of her volunteers for the whole year. As you all know everything she has put on has been a tremendous success. We have all enjoyed her parties, dances, and, dinners because she puts her heart and soul into everything she does. She has also had some

**THANK YOU** wonderful volunteers helping. (she is very bossy but we can forgive her because what she wants always turns out beautiful) lol Janet. We all love you for giving us such a great year of entertainment. You have been one of our best presidents and **WE ALL THANK YOU FOR YOUR HARD WORK**

**AND DEDICATION.**

# Multiply Your Monthly Mania!

As you probably already know; patronizing the advertisers in this newsletter also pays YOU with our Monthly Mania Cash Give-a-Way. We pay out \$400 every month to residents who submit tickets they have received from using the businesses in the newsletter. Winning is easy, just patronize any advertiser in the newsletter, then submit either the ticket or a paid receipt to us for your chance to win!

## Now You Have More Chances to Win!

We are now offering unlimited entries into our Monthly Mania drawing by just *SUGGESTING* a business to advertise.

Here is how it works:

1. Call our office and suggest a business to advertise in the newsletter
2. We will take down your information (name, address, phone number) and enter you into the next month's drawing for over \$400 in cash prizes
3. The more businesses you suggest, the more chances you have to win.  
*(To qualify each resident can only suggest a business once)*

### What businesses would you like to see advertising?

## **It starts with a spark**

---

**A** village blacksmith's apprentice went to a large city on an errand for his master. Visiting the local smithy there, he saw that the workers used a bellows to fan the flames in the forge. The bellows did a much better job of keeping the fire hot than the apprentice could do at home, where he had to fan the flame by hand. Excited, he purchased a bellows with his own money and had it taken back to his village.

When he returned, very excited, he told the blacksmith all about the bellows he'd seen. When his bellows came, he set it up in the blacksmith's shop and began pumping. But to his surprise and disappointment, no flame appeared.

The blacksmith examined the bellow. "Did you light a small fire first?"

"No," said the apprentice. "I just pumped the bellows."

The blacksmith smiled. "The bellows can only increase the size of the flame that's there. Without any spark or fire, all the pumping in the world won't produce any heat."

## **Recognizing wisdom**

---

**A** man arrived at a distant monastery to speak to the master there. "What makes a person wise?" he asked.

The master thought for a moment. "The ability to recognize."

"To recognize what?"

The master smiled. "To recognize the butterfly in a caterpillar, the eagle in an egg, and the saint in a selfish human being."

## NEA: Fewer Americans enjoy the arts in person

When was the last time you went to the symphony, the ballet, or a museum? A National Endowment for the Arts study points to a disturbing trend: The number of Americans attending core arts events like the opera, the theater, and other activities is on the decline.

According to “A Decade of Arts Engagement: Findings From the Survey of Public Participation in the Arts, 2002–2012,” only 33.4 percent of U.S. adults attended any arts events between July 2011 and July 2012—down from 34.6 percent in 2008, and down yet again from a decade earlier when the figure was 39.4 percent.

One bright spot in the report: Although only a third of U.S. adults attended a cultural event in person, 71 percent said they had watched, listened to, or downloaded some kind of artistic event via the Internet. That includes streaming pop music, however, lumping Beethoven in with Nicki Minaj.

## Americans upbeat about science

Despite controversies and disagreements about climate change, genetically modified foods, animal testing, and other scientific issues, most U.S. citizens have a positive view of science and scientists, according to a study from the Pew Research Center.

The study found that 79 percent of U.S. adults believe science has made their lives better, and a majority of them have a positive view of science’s impact on such matters as food quality, health care, and the environment. Additionally, 61 percent believe that government investment is essential to scientific progress, although 34 percent say that private investment would be sufficient.

**The effort to understand the universe is one of the very few things that lifts human life a little above the level of farce, and gives it some of the grace of tragedy.**

## Get on pace for a healthy new year

The end of the year is the perfect time to commit to a healthier lifestyle going forward. How can you maintain your resolve on a daily basis? Try these tips:

- **Pick a partner.** People who exercise with friend have a higher success rate.
- **Set concrete goals.** Don't vaguely aim to walk "more" each day. Set challenging but realistic goals. And be sure to chart your progress.
- **Shorten the duration.** Rather than a single hourlong session, aim for three 20-minute workouts or four 15-minute workouts a day. People who opt for shorter sessions actually tend to work out more over the course of a week.
- **Redefine "exercise."** You don't have to spend hours at the health club to stay in shape. Keep track of your daily activity and try to incorporate healthy behaviors like walking for at least 20 minutes, taking the stairs instead of the elevator, or getting off the bus or train a block early. Exercise will become part of your day, not an added chore.
- **Clear your mind.** Make a regular date with yourself for exercise and train yourself not to think about all the other tasks you could be doing. Focus on the here and now and don't get distracted by the future or the past.
- **Find exercise you enjoy.** Most gyms offer a variety of exercise equipment, so choose an activity that makes you feel good while you're doing it, not something you detest no matter how beneficial it may be. Riding a bike through your neighborhood is just as helpful as sitting on a stationary bicycle in the gym.
- **Set your own goals.** Even if you work with a buddy or trainer, decide for yourself what you want to achieve. Set realistic targets that challenge you, not impossible goals that make you reluctant to try.

## Did you know that December is also...

**Buckwheat Month.** Buckwheat has been providing essential nutrients, vitamins, energy, and fiber to humanity for approximately 8,000 years. It contains higher levels of zinc, copper, and manganese than other cereal grains, as well as high levels of zinc, copper, and potassium. From pancakes to soba noodles to blintzes, try adding some more buckwheat to your diet.

**National Impaired Driving Prevention Month.** The month of December is one of the busiest on the nation's roadways, and also one of the most dangerous. Sponsored by Mothers Against Drunk Driving, this month-long event seeks to raise awareness about the consequences of driving under the influence of alcohol and drugs.

**National Safe Toys and Gifts Month.** Keep your family safe during the holidays by buying only toys you can trust. Remember to immediately discard plastic wrapping or other packaging before they become dangerous playthings, and keep toys appropriate for older children away from younger siblings.

**Universal Human Rights Month.** A commemoration of the Universal Declaration of Human Rights, adopted by the General Assembly of the United Nations on Dec. 10, 1948. The need for this document grew out of the human tragedy of World War II and represents the first global expression of human rights.

**National Handwashing Awareness Week, Dec. 6-12.** Fight disease during the winter and all year long by remembering these principles of hand awareness: Wash your hands when they are dirty and before eating; don't cough or sneeze into your hands; and don't put your fingers into your eyes, nose, or mouth.

**Hanukkah, Dec. 6-14.** Beginning at sundown, this eight-day festival in the Jewish faith celebrates the triumph of light over darkness and the rededication of the Holy Temple (the Second Temple) in Jerusalem.

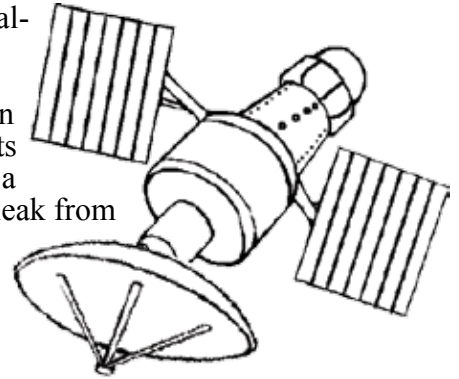

**Computer Science Education Week, Dec. 7-13.** Computer science opens doors for students. Learning even the basics will help in virtually any career. Just as we teach schoolchildren how electricity works, every 21st-century student should have a chance to learn what computers do and how they do it.

**Kwanzaa, Dec. 26-Jan. 1.** A celebration honoring African heritage and African-American culture, culminating in a feast and gift-giving. Created by Maulana Karenga, Kwanzaa was first celebrated in 1966-67.

## 'Sandwich' material may protect future space travelers

One danger posed by long space voyages is damage to a spacecraft's hull by micro-meteoroids and other space debris. Even a very small object racing at high speeds can strike like a bullet, poking a nasty hole in the side of a spaceship millions of miles from Earth. Shields offer some protection, like the one used by the International Space Station to vaporize objects before they hit. But according to the Science Daily website, scientists may be close to perfecting a self-sealing substance that can repair a small breach in a short time.

The material is made by placing a reactive liquid between two layers of a solid polymer. In experiments shooting bullets into the "sandwich," the liquid was able to quickly establish a solid plug once it was exposed to air, preventing an oxygen leak from inside a spacecraft. The substance could also be used in cars and other terrestrial structures, the researchers say.

## Undersea monolith poses a mystery

It may not be the imposing black monolith from the film "2001: A Space Odyssey," but it's mysterious nonetheless: Explorers have discovered a man-made stone structure deep in the waters off Sicily, and its purpose is a puzzle.

The object, originally on an island in the Sicilian Channel that became submerged during a flood 9,300 years ago, is 12 meters long (39 feet) and weighs 15 tons. Scientists estimate that it's about 9,350 years old. Broken in two pieces at a depth of 40 meters (139 feet), the object has three roughly similar holes: one on the top, and two more on its sides. The structure would have required cutting, extraction, transport, and installation, suggesting its makers had fairly advanced engineering skills. Its purpose remains unclear.

## How do you weigh a dead dinosaur?

Paleontologists routinely tell us that a particular dinosaur or mammal from millions of years ago weighed X pounds, but how do they measure the weight of an animal that's extinct? Here's one new technique scientists have developed:

The first step is constructing a digital model of the bones recovered. Then a computer program covers the model in a digital "shrink wrap" to estimate the animal's volume. In the final step, they come up with an estimate using a volume-to-mass conversion based on 14 living mammals starting with the red deer (90 kilograms) to the African elephant (2.7 metric tons).

This process allows researchers to calculate that the woolly mammoth weighed in at 3.6 metric tons, and the giant ground sloth was 3.7 metric tons.
