## Responding to adversity

---

Once upon a time, a daughter complained to her father that her life was miserable. She was tired of fighting and struggling all the time. It seemed that just as one problem was solved, another soon followed.

Her father, a chef, took her to the kitchen. He filled three pots with water and placed each on a high fire. Once the three pots began to boil, he placed a potato in one pot, an egg in the second pot, and some ground coffee beans in the third pot.

After 20 minutes he turned off the burners. He took the potato out of the pot and placed it in a bowl. He pulled the boiled egg out and placed it in a second bowl. Then he ladled the coffee out and placed it in a cup.

“What do you see?” he asked.

“A potato, an egg, and some coffee,” she replied.

“Look closer,” he said, “and touch the potato.” She did and noted that it was very soft. He then asked her to take the egg and break it. After pulling off the shell, she observed the hard-boiled egg. Finally, he asked her to sip the coffee. Its rich aroma brought a smile to her face.

“But what does this mean?” she asked.

“The potato, the egg, and the coffee beans all faced the same adversity—boiling water,” her father explained. “But each one reacted differently. The potato went in strong and hard, but in the boiling water, it became soft and weak. The egg was fragile, with its thin outer shell protecting its interior. In the boiling water, the inside of the egg became hard.

“However, the ground coffee beans were unique. After they were exposed to the boiling water, they changed the water and created something new.

“Which are you?” he asked his daughter. “When adversity knocks on your door, how do you respond? Are you a potato, an egg, or a coffee bean?”

In life, things happen to us, but the only thing that truly matters is what happens within us.

## Search for Earthlike worlds takes a step forward

---

Scientists searching for Earthlike worlds beyond the solar system have a new tool: NEAR (Near Earths in the Alpha Cen Region), which began operating in May, will scan the Alpha Centauri system for habitable planets.

NEAR is a thermal coronagraph installed in a telescope in Chile that can block the light of stars and look for heat radiating from worlds in orbit. Alpha Centauri is a three-star system located 4.3 light-years away, the closest system to our world. Astronomers have already discovered planets in the system—an Earth-size planet dubbed Proxima b, orbiting the red dwarf star Proxima Centauri, and a planet candidate circling the same star.

NEAR will look at Alpha Centauri AB, a binary star system, using an upgrade to an existing instrument to block out the glare of the two stars and also compensate for the blur of Earth’s own atmosphere. It’s capable of spotting planets twice the size of Earth or larger.

## Bait and switch

---

A little girl walked into her Sunday school class half an hour late. When the teacher asked why she was so tardy, the young girl replied, “I wanted to go fishing with my daddy, but he said I had to come to Sunday school.”

Pleased with the father’s spiritual dedication, the teacher asked, “And did he tell you why he wanted you to come here?”

“He said he didn’t have enough bait for the two of us.”

## How to tell you’re not in college anymore

---

You’re not a kid anymore. Here’s the proof:

- Your refrigerator has more food than beer in it.
- 6 a.m. is when you get up, not when you go to bed.
- You hear your favorite song—on the elevator.
- You make plans to watch the Weather Channel.
- A clean sweater and jeans are no longer considered “dressing up.”
- You have no idea how late the pizza place delivers.
- Your older relatives feel comfortable telling dirty jokes around you.
- You feed your dog Science Diet instead of cold pizza.
- A \$7 bottle of wine is no longer “the good stuff.”

## Where did you start?

---

A child and his father were helping out an elderly neighbor. They raked the neighbor’s leaves, organized his garage, put the trash out, and did other small jobs around the neighbor’s house.

When they finished their work, the child and his father went up to the front door. The old man thanked them for their help, and then the child impulsively asked, “How old are you?”

The embarrassed father apologized for his son’s question, but the neighbor laughed. “That’s OK. He’s just curious. Young man, I’m 92 years old.”

The child stared at him. “Did you start at number one?”

We must believe that we are gifted for something, and that this thing, at whatever cost, must be attained.

## How much coffee can you safely drink? A lot

Coffee lovers can be understandably confused by the mixed messages they're getting about the health risks/ benefits of their favorite beverage. Some studies have suggested that drinking too much coffee can cause stiffening of the arteries, increasing the chance of suffering a heart attack or stroke. On the other hand ...

A new study from the British Heart Association, reported on the CNN website, suggests that drinking three cups of coffee or more a day is no worse for arteries than drinking a single cup. Researchers studied more than 8,000 people in the United Kingdom, some of whom drank one coffee or less a day, others who drank one to three cups, and a third group who reported consuming up to 25 cups of coffee a day. All participants were given MRI heart scans and infrared pulse wave tests, and scientists corrected the data for such factors as age, weight, diet, tobacco and alcohol use, and other factors.

The findings appear to show that drinking three cups or more a day doesn't significantly increase artery stiffness compared with consuming just one cup. No one is recommending binging on 20 cups or more per day, but you can rest easier knowing your arteries apparently aren't in danger.

## Cold or the flu? How to tell

You're coughing, sniffing, feeling achy. Is it a cold—or the flu? It can be hard to tell, but the NPR website offers this advice for telling the difference so you can be prepared when flu season takes hold:

- The flu strikes fast. If you suddenly feel flattened, chances are it's the flu. A cold will usually take several days to build up.
- Take your temperature. Colds generally cause a mild fever of 99–100 degrees Fahrenheit. The flu's fever is typically higher—101 degrees or more—and accompanied by chills and body aches.
- Listen to your cough. You'll be congested with a cold, and postnasal drip can make you cough. Flu's coughing is more severe, and can lead to trouble breathing.

In most cases, people can ride out the cold or the flu with the help of antiviral medications. However, many health factors can increase the danger—pregnancy, asthma, heart disease, and other conditions. Contact your doctor to determine whether more aggressive treatment is called for.

## Top 10 states for having fun

Where's the most fun place to live in the United States? The WalletHub website analyzed all 50 states using factors that included the cost of movies, accessibility to national parks, and casinos per capita. Here's where the fun is:

1. California
2. Florida
3. New York
4. Washington
5. Colorado
6. Nevada
7. Minnesota
8. Pennsylvania
9. Oregon
10. Texas

The least fun state? West Virginia.

## Germ's like these hiding places

You might think your bathroom is the germiest place in your home. You'd be wrong, according to the MSN website. Watch out for these locations that have lots more germs than your toilet:

- **Cutting boards.** To keep them free of germs, don't just rinse them in the sink. Wash your cutting board in water and dish soap, then soak in water mixed with bleach—two teaspoons for plastic, two tablespoons for wood.

- **Dish cloths.** These have everything that's necessary for bacteria to thrive: warmth, moisture, and organic material from food. Wash them often on a hot cycle and tumble-dry them in a dryer.
- **Smartphones.** You take them everywhere, including the bathroom, and you usually don't wash your hands every time you pick yours up. Clean your phone with a cloth soaked in a solution of 60% water and 40% rubbing alcohol. Wring the cloth out well so that the moisture doesn't damage your phone.

- **Keyboards.** Computer keyboards can be covered with 20,500 more bacteria than the average toilet seat. Clean your keyboard with a cotton swab dipped in rubbing alcohol while it's unplugged. Use compressed air to get rid of dirt around the keys.

- **Steering wheels.** You probably don't wear gloves when you drive, which means you're coating your wheel with germs and bacteria. Clean your wheel and other parts of your car regularly.
