2016 Tax Tips for Canadian Residents:

Don't forget to file your Form 8840 Closer Connection with the IRS before June 15th if you were in the US in excess of 120 days for the 2016 calendar year.

If individuals rented their coach during 2016 you will be required to file the US 1040 NR. The only income (loss) you need to report is the rental income. In all likelihood there will be a loss to report as you are able to deduct all expenses attributed to the rental income. Same for your Canadian return. If you have a loss to report, the loss will be able to reduce other taxable income.

If you sold your coach in 2016 you are required to report any gain or loss on your Canadian T1. Remember to use the correct exchange rate for your cost base and sale. The cost of any improvements to the coach or property will increase the cost base. Don't forget the exchange rate. If the property is jointly owned the gain/loss may be reported 50/50 on a couple's tax returns. Failure to report a sale could trigger interest and penalties assessed by Canada Revenue Agency.

Exploring the mysteries of an ancient codex

British and Dutch scientists have used high-tech imaging to uncover the secrets of an ancient Mexican manuscript, the eScience News website reports. The manuscript, known as the Codex Seiden, is a strip of deer hide five meters long that's been covered with gesso (a white plaster composed of gypsum and chalk) and folded according to style to make a document 20 pages long.

It dates back to approximately 1560, and was found in what's now known as the Oaxaca region of Mexico. Like other codices from that area and others, the Codex Seiden uses brightly-colored symbols to record history: wars, genealogy, and cultural information.

One intriguing discovery: The high-tech imaging found the image of an individual represented by a glyph of a twisted cord and a flint knife. The man or woman resembles a character found in other codices, and may be an important ancestor of two families connected to other archeological sites in Mexico.

Collision course

A huge space cloud is on a collision course with our galaxy, but don't panic—it's not expected to reach us for another 30 million years. According to NASA's Science Mission Directorate website, Smith's cloud, as it's known, is composed of enough gas to create two million stars the size of our size, and is orbiting the Milky Way at 700,000 mph.

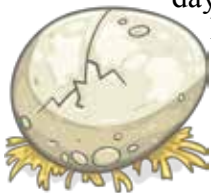

The collision won't have much impact for anyone still around, as the cloud is much smaller than our galaxy, but scientists are watching it closely anyway, seeking explanations for its origin as well as other secrets of the universe.

Big dinosaurs, big eggs, and hatching times

How long did dinosaur eggs take to hatch? Paleontologists know very little about dinosaur embryology, but with CT scanners and high-resolution microscopy, they're finding out more.

The SciNews website reports on a recent find: Non-avian dinosaurs likely took longer to hatch than their feathered counterparts, much as modern reptiles hatch at a later age than today's birds. Scientists looked at the fossilized remains of two dinosaur embryos, looking at the formation of their teeth. Analyzing growth lines, they were able to determine that one dinosaur had died at three months, and the other at six months.

The difference in hatching times may have had an impact on the large dinosaurs' eventual demise. Because they require more food and other resources to live to adult size, larger reptiles were likely more vulnerable than smaller animals (amphibians, birds, and other mammals) to an extinction event.

Did you know that April is also...

ASPCA Month. The American Society for the Prevention of Cruelty to Animals was the first humane society established in North America, and today it's one of the largest in the world. The ASPCA's mission, as stated by founder Henry Bergh in 1866, is "to provide effective means for the prevention of cruelty to animals throughout the United States."

Global Child Nutrition Month. Sponsored by the Global Child Nutrition Foundation, whose mission is to expand opportunities for the world's children to receive adequate nutrition for learning and help them achieve their potential. "We envision a future where school meals sustainably nourish all children and help them, their families, communities, and nations to thrive," reads its vision statement.

National Autism Awareness Month. Launched by the Autism Society nearly a quarter-century ago, this event is a nationwide effort to promote autism awareness, inclusion and self-determination for all, and assure that each person with autism spectrum disorder is provided the opportunity to achieve the highest possible quality of life.

National Kite Month. Every year in April, kite enthusiasts across North America celebrate the history and the future of the world's favorite pastime by letting their kites fly. April was chosen as National Kite Month because as the first month in spring, it's when most kite fliers are starting to bring their kites out of the closet and prepare for warm weather and summer fun.

National Youth Violence Prevention Week, April 3-7. A campaign to raise awareness and educate students, teachers, school administrators, counselors, school resource officers, school staff, parents, and the public on effective ways to prevent or reduce youth violence.

National Robotics Week, April 8-16. The purpose of National Robotics Week is to celebrate the United States as a leader in robotics technology development, educate the public about how robotics technology affects society, advocate for increased funding for robotics technology research and development, and inspire students of all ages to pursue careers in robotics and other science, technology, engineering, and math-related fields.

Animal Care and Control Appreciation Week, April 9-15. A week of appreciation and recognition for the hard-working men and women who risk their lives and devote huge amounts of personal time and resources while serving the public as well as animals in need.

Money Smart Week, April 22-29. Money Smart Week began as a coordinated effort of the Money Smart Advisory Council, a diverse group of more than 40 Chicago-area organizations working together to promote personal financial literacy.

How doctors stay healthy

Doctors are exposed to germs and diseases every day, so how do they avoid getting sick themselves? Follow their rules for staying healthy when surrounded by illness:

- **Wash your hands often.** Use soap and water, and take your time. Try singing “Happy Birthday to You” twice in your head as you wash. Wash your hands before eating, after using the bathroom, and before touching your face and mouth. If washing is inconvenient, use a hand sanitizer.
- **Eat a healthy diet.** A good mix of fruits and vegetables will provide the vitamins your immune system needs to fight off infections early—before they balloon into major health issues.
- **Get sufficient sleep.** Lost sleep can damage your ability to fight off disease. Get seven to nine hours a night to stay healthy and alert.
- **Clean off surfaces.** Wipe down your phone and keyboard often to get rid of germs and bacteria. Wash or sanitize your hands after touching doorknobs or shaking hands. Remember that some viruses and bacteria can live for days on surfaces that haven’t been cleaned.

Be on the lookout for ‘sick building syndrome’

Is your home or workplace making you sick? “Sick building syndrome,” also known as “multiple chemical sensitivity,” is a condition in which people become ill due to prolonged exposure to mold, formaldehyde, or other dangerous substances that can spread through a building’s ventilation system virtually undetected. Everyone should watch for signs that their environment may be hazardous to his or her health. Here are some symptoms:

- Frequent headaches
- Persistent fatigue
- Dizziness and nausea
- Difficulty with concentration
- Problems with memory
- Frequent muscle pain, stiffness, or cramps
- Dry skin or itchiness
- Chest pain or heart palpitations
- Persistent sore throat and/or coughing

Help for Severe Aortic Stenosis

Severe aortic stenosis is a narrowed aortic heart valve that doesn't open and close properly, reducing blood flow to the rest of the body.

Morton Plant Hospital is now enrolling eligible patients in the Medtronic Evolut R low-risk trial, which investigates the safety and effectiveness of a transcatheter aortic valve replacement (TAVR) system in patients with severe aortic stenosis who are at a low surgical mortality risk. TAVR is a minimally invasive alternative to open-heart surgery used to treat failing aortic heart valves in patients with severe aortic stenosis. Morton Plant Hospital was chosen as the first hospital in Tampa Bay to offer the TAVR procedure for patients with severe aortic stenosis who were at an intermediate or high surgical mortality risk. Our team has completed more than 700 TAVR procedures over the last five years.

To see if you or a loved one with severe aortic stenosis may be eligible for this trial, or for more information on the trial, call the Center for Advanced Valve and Structural Heart Care at Morton Plant Hospital at **(855) 44-VALVE (855-448-2583)** or visit **MortonPlantValveTrial.org**.

VINYL IS FINAL

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word – the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

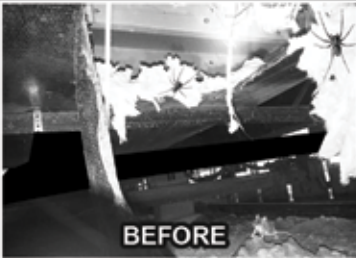

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"

George Lordstrom, Saint Petersburg, FL

Watch for these heart attack symptoms

Hearth disease is the leading cause of death for both men and women in the United States. Stay on the lookout for these basic signs of a heart attack:

- Chest pain. The classic signal of a heart attack is an uncomfortable feeling of pressure or squeezing in the chest.
- Jaw or arm pain. This tends to be more common in women, but don't ignore it.
- Heartburn/upset stomach. Don't write off stomach problems as just a minor ailment. Nausea and vomiting can occur during a heart attack.
- Shortness of breath. Again, more common among women, but seek assistance if you're having trouble breathing.
- Dizziness. You may feel lightheaded or on the verge of passing out.
- Sweating. Breaking out in a cold sweat is an additional symptom of a heart attack.

Choosing a doctor? Consider this study

Choosing a doctor is an important decision. Here's one factor to keep in mind: A study by the Harvard School of Public Health has found that patients who are treated by female doctors are less likely to die of the illness they're being treated for, and they're less likely to return to the hospital after discharge.

The study examined records of more than 1.5 million elderly Medicare patients admitted to hospitals for reasons other than surgery from 2011 to 2015. Patients treated by female physicians had a lower 30-day mortality rate than those treated by men, and over the course of four years, approximately 11 percent of patients treated by women died within one month of being hospitalized, compared with slightly more—11.5 percent—of patients treated by men.

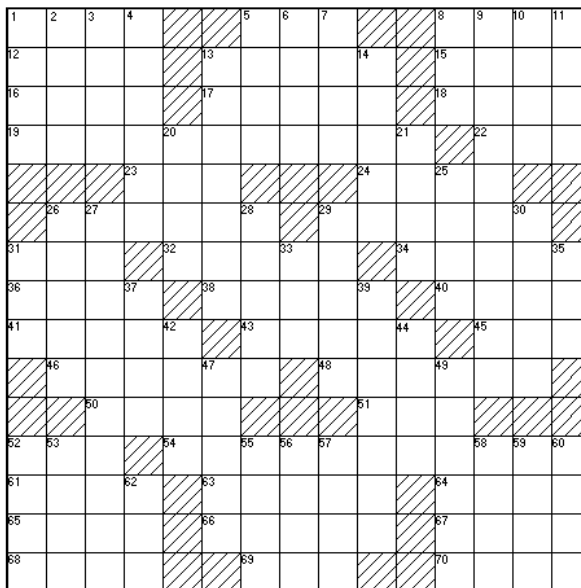

Healthy citizens are the greatest asset any country can have.

—Winston S. Churchill

Take these steps to innovation

Innovation is a journey that depends on continuous improvement. Expert James O’Loghlin suggests following these steps to get started:

- Focus on value. Look for inefficiencies in whatever kind of work you do. Challenge assumptions about processes, products, services, and customers. Search for ways to save time or money and increase the value of what your organization does.
- Gather ideas. Brainstorm some possible solutions, and share them with your colleagues. Ask for feedback. Be prepared for criticism, and stay ready to adapt your ideas as necessary, but don’t give in too quickly. Be persistent.
- Present your ideas. Learn how to pitch your innovative ideas without jargon or needless detail. Focus on the story you want to tell—how your idea will help the organization. Anticipate likely questions and objections to show you’ve thought everything through.
- Implement your solution. Be prepared to get to work. Don’t try to do everything yourself; assemble a team to help you with test projects and full implementation.
- Repeat. Follow the same steps for your next project. Once people see your commitment to innovation, they’ll be eager to join in.

Lost in space

Scammers are some of the most creative people around. Finding new and innovative ways of separating fools and their money is what keeps them in business. The famous “Nigerian scam letter” sent by email or fax is perhaps the best known: The sender claims to be a deposed president or king in need of assistance to liberate several million dollars from a foreign bank account. All the recipient has to do is forward some money, and possibly give the sender access to a bank account. The target eventually realizes he or she’s been had, but usually not after losing lots of money.

A new twist on the con game, as reported on the Mother Nature Network website, takes the target into outer space: Victims receive an email from a scientist who claims that in 1989, a Nigerian astronaut went on a mission to a secret Russian space station—and was stranded there when the Soviet Union collapsed. The poor space traveler is still up there, more than 25 years later. He’s been resupplied from the ground all this time, and he’s in good health, but he’d really like to come home. Fortunately, he has back pay coming to him in the amount of about \$15 million dollars. All the target has to do is . . . well, you can probably guess.

No one seems to know if anyone has fallen for this variation of the scam, but it’s certainly a testament to the crooks’ ingenuity—and possibly faith in the gullibility of their victims.

Not Stupid

A boy named Johnny hung out at the local grocery store. The manager noticed that the other boys who hung out in front of the store always teased him, calling him stupid and playing tricks on him.

One of their tricks was to offer Johnny his choice between a shiny nickel and a dusty old dime. Johnny always took the nickel because it was bigger and shinier.

One day the store manager took Johnny off to one side. “Look, son, those boys are making fun of you. They think you don’t know the dime is worth more than the nickel. Don’t you know that?”

“Yeah,” Johnny said, “but if I took the dime, they’d quit doing it!”

Beating the competition

A barber was confident in the knowledge that his was the only barber shop in his small town. One day, though, a new barber shop opened right across the street. A sign out front proclaimed, “EVERYTHING FOR \$10! \$10 haircuts, \$10 perms, everything for \$10.”

Soon all his customers began patronizing the cut-rate shop across the street, and the man’s once profitable business took a nosedive. In desperation, he hired a big-city business consultant, saying to him, “I’m finished. How in the world am I going to compete with that big outfit with all that advertising and with those kind of prices?”

The consultant stood looking at the shop across the street for several minutes. Then he picked up the phone and dialed the town’s only billboard company.

“Yes,” he said, “right on top of our building. In the biggest letters you can find, and do it right away. And make the message read: WE FIX \$10 HAIRCUTS.”

The person who can bring the spirit of laughter into a room is indeed blessed.

—Bennett Cerf

Monthly Mania: It Pays (Up to \$100) To Patronize the Advertisers in Your Newsletter

THOUSANDS manufactured home residents have won over **\$135,000** since our contest began. It's simple to play ... when you patronize a current advertiser, ask for a Monthly Mania ticket (or a reasonable facsimile) and fill it out completely. Put the ticket in our Monthly Mania drop box in your community or **mail your paid receipt** to us at **Monthly Media • 220 Bahama St. • Venice, FL 34285**. That's all you do. At the end of the month the Publishers will pick up the tickets and hold a drawing. If your ticket is drawn, we mail you a check.

(Allow 4-6 weeks for mailing of check). This month's cash winners are:

Adjust your outlook for success

Success depends in large part on having the right attitude. You can make an impact with three basic habits:

- Focus on the bright side. Emphasize what you enjoy about your job and the people you work with, and express your enjoyment as much as you can.
- Turn negatives into positives. Don't obsess over obstacles and setbacks. Treat failures as an opportunity to spot mistakes and move forward.
- Move quickly. Don't waste time when you've got a problem to solve or an idea to put into action. A rapid response gets attention and builds excitement.

What goes up . . .

Isaac Newton may have formulated the laws of motion and the theory of gravity, but on the stock market, he was just as fallible as anybody. As reported on the Business Insider website, the famed mathematician owned shares in the South Sea Company, at the time (1720) the hottest stock around. When he got worried that the market was getting out of control, he sold his shares for a 100 percent profit of £7,000.

Smart, right? Unfortunately, a few months later as South Sea's stock continued to skyrocket, Newton went back in and bought up a parcel of stock at a much higher price. He ended up losing £20,000—about \$3 million in today's money. He was so upset that for the rest of his life he insisted no one speak the name "South Sea" in front of him.
