Happy New Year!

As the new board is now in transition, we would like to thank former President John Brennan for his two years of service to our organization. He gave the Residents Club many hours of his time, expertise, leadership and knowledge.

We would also like to thank former treasurer, Ed Kohler, for his many years of service. He will be a hard act to follow. We appreciate all the time, expertise, and energy to the Residents Club.

The board is open to new ideas as long as they pertain to "Activities" as opposed to homeowner issues. Please submit your ideas in writing to either me or Hazel Regan. On January 6th the pancake breakfast crew served 83 residents. The 50/50 was won by Elsie Bonarrigo in the amount of \$53.00. The next Pancake breakfast will be February 3rd from 8:30 to 10:00am. In the club house. The price is \$4.00 per person. Tickets are purchased at the door.

We are looking forward to the upcoming year and will continue to provide quality activities and entertainment to you. Your support is greatly appreciated.

Our next Residents meeting will be on Monday, February 5th at 7:00p.m., in the clubhouse. Refreshments will be served at the conclusion of the meeting.

The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word – the house is doing all the talking! Thank you so much for my beautiful new house."

### Canadian Club – Valentine's Dance

The celebrating of St. Valentine's Day is rooted in the distant past. In the Middle Ages the tradition of choosing a romantic partner on that particular saint's day began because it was believed that birds began mating on that day. Yet, there doesn't seem to be any evidence that the historical Saint Valentine, an early Christian martyred by the Romans, had any connections to either birds or romance. In the 1800s stories abounded that the roots of St. Valentine's Day reached back to Rome and the festival of Lupercalia on the 15th of February.

Despite the day's mysterious and puzzling roots, it's obvious people have observed St. Valentine's Day for centuries. We wish you all a Happy Valentine's Day!

Saturday February 17th is the annual Valentine's Day Dance hosted by the Canadian Club and open to the entire Oakcrest/Acorn community. As in past years, we will be serving delicious Plant City strawberries and ice cream. Get your tickets soon for this very popular event, as they are limited. Entertainment will be provided by the always popular 'DJ Carlos. Be sure to BYOB and snacks to this fun event. Oh yes ...and bring your 'dancing shoes'.

## Interstellar asteroid is a first

---

**A**steroids can be found throughout our solar system, but astronomers have recently discovered one in interstellar space. The Science News website reports that the object, first believed to be a comet, is approaching the solar system at an unusually steep angle. Dubbed A/2017 U1, the asteroid is about 400 meters across and traveling 25.5 kilometers per second on a slingshot path past the sun. Astronomers plan to measure the colors in its reflected light to determine what it's made of and seek clues to its origins.

## Red sky in Asia mystery solved

---

**I**t's a centuries-old mystery: In the year 1770, skies over Asia turned a bright red for nine days. The cause of this unusual phenomenon has never been identified. Now, though, scientists believe they have an answer.

As reported on the Slate website, researchers recently uncovered a collection of 111 contemporaneous documents from that time, and learned that the red sky had lasted longer than previously thought (just two days) and was much larger as well.

Scientists' conclusion: The effect was created by an aurora caused by solar activity, sparking the longest geomagnetic storm in recorded history.

A similar aurora was observed on two nights in 1859 by a massive solar storm known as the "Carrington Flare." Analysis of records of sunspot activity in 1770 suggests that the Asian aurora was caused by sunspot twice as large as those that created the Carrington event.

If such an event happened today, it would likely have catastrophic effects, knocking out satellites crucial to communications and GPS instruments.

## New mineral found on Martian surface

---

**N**ASA has discovered evidence of an ironoxide mineral on the surface of Mars, the Science News website reports. The mineral, called hematite, was detected by spectral analysis of photos taken by the space agency's Curiosity rover in an area known as the Vera Rubin Ridge.

Curiosity zeroed in on a rock dubbed "Christmas Cove," and used its dust removal tool, a wire-bristled brush, to uncover an area some 2.5 inches across.

Observations made the rover's Mast Camera (Mastcam) and its Chemistry and Camera (ChemCam) confirmed the presence of the hematite, a mineral that may provide information about ancient environmental conditions on the red planet.
