# Homeowners of Oak Crest / Acorn Residents, Inc.

By Donna Tope, President. Lot #648 727-474-3443

**O**ur park's occupancy will continue to increase over the next several months. Personally, I am looking forward to seeing our winter residents. I hope you are too.

With the increased population, we all need to be vigilant about stopping at "stop" signs and watching our speed. More people will be walking and riding bikes. Also, let's try to get "outsiders" to be careful as well by perhaps holding up our hand or something like that when we see someone going too fast or blowing through stop signs. Every little bit helps.

I believe we were very blessed/fortunate/lucky with the outcome of Irma. I expected so much worse for the state overall and even though I believed we would be spared, I have not been through this before and didn't know what we would come home to.

There is still quite a bit of concern by several (many?) residents about the quality of the lawn service. We would recommend trying to be home on your service day so you can monitor your home. If there is a problem of any kind, call the office immediately so they can alert the supervisor of the crew to come and take care of the situation. We can't take care of a problem at a once-a-month Monday meeting. All we can do is pass it along. We will be reminded by management of the procedure which I just outlined.

Hope to see you at our next meeting on November 27th.

Per Article II of the By-Laws of the HOA, all owners are members and are to pay a \$10.00 annual fee as a part of ownership. If your home number appears below, you have paid the current year fee. If it doesn't show, you can drop off \$10.00 at Lot 291 (Ed Hahn, treasurer). Ed is also willing to come pick up the fee from you, just give him a call at 727-519-3023: 2,3,14, 15,21,24,29,30,33,41,48,54,63,65,67,68,72,76,82,84,85,88,89,92,94,98,101,103,107,108,115, 127,128,133,134,136,137,142,149,152,154,166,167,170,172,178,181,186,187,188,192,194,206,218,222,224,232,233,234,239,241,247,249,250,258,259,260,261,262,263,270,272,273,274,277,281,283,284,285,290,291,292,295,297,298,305,308,312,313,314,315,318,322,328,329,330,331,332,333,334,335,336,340,343,346,347,348,352,356,357,361,367,370,373,376,378,380,381,383,384,385,387,389,390,392,394,395,396,397,402,404,406,407,414,415,416,418,419,420,422,426,427,446,430,437,438,440,442,449,453,454,455,456,458,462,466,467,468,471,476,477,487,489,490,491,496,498,507,510,511,523,526,528,536,539,540,541,544,547,555,556,564,565,566,577,583,593,597,598,602,607,609,610,611,616,619,620,625,626,628,629,631,635,636,639,645,646,648,650,653As of 9/30/17

# Help for Severe Aortic Stenosis

Severe aortic stenosis is a narrowed aortic heart valve that doesn't open and close properly, reducing blood flow to the rest of the body.

Morton Plant Hospital is now enrolling eligible patients in the Medtronic Evolut R low-risk trial, which investigates the safety and effectiveness of a transcatheter aortic valve replacement (TAVR) system in patients with severe aortic stenosis who are at a low surgical mortality risk. TAVR is a minimally invasive alternative to open-heart surgery used to treat failing aortic heart valves in patients with severe aortic stenosis. Morton Plant Hospital was chosen as the first hospital in Tampa Bay to offer the TAVR procedure for patients with severe aortic stenosis who were at an intermediate or high surgical mortality risk. Our team has completed more than 700 TAVR procedures over the last five years.

To see if you or a loved one with severe aortic stenosis may be eligible for this trial, or for more information on the trial, call the Center for Advanced Valve and Structural Heart Care at Morton Plant Hospital at **(855) 44-VALVE (855-448-2583)** or visit **[MortonPlantValveTrial.org](http://MortonPlantValveTrial.org)**.

"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word – the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"

## One minute a day may lead to stronger bones

**K**eeping your bones in good shape is vital to your health as you grow older, especially for women. Research reported on the Medical News Today website suggests that women may be able to keep their bones strong by running just one minute a day.

Examining data from more than 2,500 women, researchers found that women who participated in high-intensity, weight-bearing physical activity like running 60-120 seconds a day had 4 percent better bone health than women who took part in less than a minute of physical activity. Women who performed more than two minutes of exercise had 6 percent better bone health.

The researchers cautioned, though, that they can't be sure whether high-intensity exercise leads to better bone health, or whether people with better bone health tend to exercise more.

## New findings about the solar system intrigue scientists

**O**ur solar system is full of interesting places—maybe not to live or even visit, but locations where life might flourish under the right conditions, or may once have been present. Two recent examples from the Science News website:

• **Life on Titan?** Scientists have discovered that the atmosphere of Saturn's moon Titan contains vinyl cyanide—a molecule that forms membrane-like structures and could support life. Computer simulations suggest the molecule is capable of forming flexible bubbles known as azotosomes, that could serve as an outer shell “protecting” genetic material from biochemical reactions in the moon's frigid methane seas. No one knows whether azotosomes actually exist on Titan, though. A probe would have to check out the seas to detect them.

• **Water on Venus?** With a surface temperature of 460 degrees, Venus is too hot to support water or life as we know it, but scientists speculate it might not always have been so inhospitable. The second planet's slow rotation—116 Earth days for a single Venusian day—might have led to a gradual cloud buildup in its atmosphere some 750 million years ago, bringing surface temperatures down to approximately 15 degrees Celsius—enough for the formation of a shallow ocean. What happened to the oceans, or whether they even existed, isn't clear. Scientists speculate they may have boiled away or been absorbed into the planet's interior.
