## POINTE WEST ROC

---

**N**OTICE: To all park dwellers. If you want to use the clubhouse, you must go to the office and fill out paperwork to request the date and time of your function. This is to avoid having conflicts in scheduling and is required. Thank you for your cooperation in this matter.

## DECEMBER LADIES LUNCHEON

---

**T**he group met December 8th at the club house for their annual Christmas luncheon. The food was outstanding and the entertainment was exceptional. Santa and Rudolph had two elves passing out Christmas grab bag gifts to everyone!

The luncheon was a huge success, so the one in February will be on February 9th. The place will be announced shortly. We hope all the ladies will attend the next luncheon.

## POINT WEST ROC FUN

---

**P**ointe West ROC is the place to be for having fun! There are so many things to do. Swim, shuffle (indoor & out), cards, and travel!

Terry Knapik (Lot 2-O) can show you lots of fun places to go! Like on overnight trips for example.

1. Such as Hats, Horses, Bets & Bourbon in Kentucky
2. Nashville’s Music City, Chattanooga & more.
3. Veteran’s Day in Washington, D.C.
4. Miami’s South Beach, Key West and more.
5. How about Love & War in Texas?

We can do so much here at Pointe West ROC! That’s why every- one comes here to stay. We all love having good friends and neighbors to do these things with. Pointe West is a great place and we all love being here.

Hope to see you soon!

## ROC ELECTIONS

## Interstellar asteroid is a first

**A**steroids can be found throughout our solar system, but astronomers have recently discovered one in interstellar space. The Science News website reports that the object, first believed to be a comet, is approaching the solar system at an unusually steep angle. Dubbed A/2017 U1, the asteroid is about 400 meters across and traveling 25.5 kilometers per second on a slingshot path past the sun. Astronomers plan to measure the colors in its reflected light to determine what it's made of and seek clues to its origins.

## Red sky in Asia mystery solved

**I**t's a centuries-old mystery: In the year 1770, skies over Asia turned a bright red for nine days. The cause of this unusual phenomenon has never been identified. Now, though, scientists believe they have an answer.

As reported on the Slate website, researchers recently uncovered a collection of 111 contemporaneous documents from that time, and learned that the red sky had lasted longer than previously thought (just two days) and was much larger as well.

Scientists' conclusion: The effect was created by an aurora caused by solar activity, sparking the longest geomagnetic storm in recorded history.

A similar aurora was observed on two nights in 1859 by a massive solar storm known as the "Carrington Flare." Analysis of records of sunspot activity in 1770 suggests that the Asian aurora was caused by sunspot twice as large as those that created the Carrington event.

If such an event happened today, it would likely have catastrophic effects, knocking out satellites crucial to communications and GPS instruments.

## New mineral found on Martian surface

**N**ASA has discovered evidence of an ironoxide mineral on the surface of Mars, the Science News website reports. The mineral, called hematite, was detected by spectral analysis of photos taken by the space agency's Curiosity rover in an area known as the Vera Rubin Ridge.

Curiosity zeroed in on a rock dubbed "Christmas Cove," and used its dust removal tool, a wire-bristled brush, to uncover an area some 2.5 inches across.

Observations made the rover's Mast Camera (Mastcam) and its Chemistry and Camera (ChemCam) confirmed the presence of the hematite, a mineral that may provide information about ancient environmental conditions on the red planet.
