"...I am so happy with my new windows...I'd like to commend your work crew. Earbie and Larry were fantastic! I couldn't believe the clean-up EVERYDAY! The whole job took just a week even with all the rain delays. I would and WILL highly recommend your company to my friends and neighbors. Of course I won't need to say a word - the house is doing all the talking! Thank you so much for my beautiful new house."

Carol Zapiecki, Clearwater, FL

"Just a short note to express my appreciation for the work done on my mobile home. The crews that worked here...were gentlemen at all times, efficient, knowledgeable and prompt. You can be sure if I run into anybody who needs your type of work, I will surely recommend your company. It has been a very satisfying experience!"

Long Time Resident of Serendipity Passes Away

Helen C. Petty age 98 years, passed away quietly in the early morning hours of July 14, 2017 at Mease Nursing Home in Dunedin, Fl. Helen and her husband Jim moved to their home on the southwest corner of Serendipity at #276 over forty years ago! Jim passed shortly after they moved here after retirement. Helen stayed and became a staple in the park! Her front porch became a nightly get together spot for many of the residents here in the park.

Helen was a beautician by profession and after her retirement, continued to beautify lives by working as a caregiver for many of the Serendipity residents.

Helen was born in Elmira, New York and her ashes will return home to be buried alongside her husband. The couple had no children but many relatives. Helen was from a family of eleven siblings who have all predeceased her. Many of you know her niece, Ruthie Iorio and her husband Carmine. Ruthie lived with her Aunt Helen for almost three years to take care of her, before Helen was placed in full time nursing care over 2 years ago. The couple are snowbirds from Honeoye, New York and will continue travel to Helen's home for most of the winter in the future years.

Many of Helen's friends have also passed, yet, there are those who still remember her and loved her sense of humor, kindness, and wild and crazy antics! Ruthie wishes to thank Shirley and Marie Cline and Bob and Linda Currie for taking care of Auntie Helen when she was away and being such dear friends to her.

Helen's life will be celebrated in Elmira, New York in August. She lived a wonderful life and now is at peace with her savior Jesus.

Columbus' anchor salvaged from the depths

A team of explorers believe they've discovered an anchor from one of Christopher Columbus' ships in the Caribbean. According to a story on the Fox News website, an analysis of the anchor shows that it dates from somewhere between 1492 and 1550. It weighed 1,200-1,500 pounds and probably belonged to a 300-ton vessel, typical of Columbus' time.

The anchor is believed to come from a fleet of smaller ships called caravels, which included the Pinta. Captained by Vicente Pinzon on one of the "minor voyages" of Columbus' third expedition to the New World, the ship sank in a hurricane near the Turks and Caicos islands in 1500.

In addition to the anchor, the team brought up other artifacts at the shipwreck site, including grappling hooks used for salvaging cargo from shipwrecks, as well as pieces of pottery and an olive jar painted with indigo.

Scientists create negative mass in the laboratory

Negative mass might sound like something out of science fiction, but physicists have created it in a laboratory. The BBC News website reports that scientists at Washington State University have created a particle composed of negative mass by using lasers to trap atoms of rubidium and then cooling them down to just above absolute zero. This caused the atoms to behave as a superfluid liquid, flowing without losing any energy.

Paradoxically, if you push something with negative mass, it accelerates in your direction, following behavior predicted by quantum mechanics. Scientists expect the technique to help them solve questions about black holes, neutron stars, and dark energy in the cosmos.

Ancient bone raises modern questions

An artifact unearthed in Crimea may shed new light on our Neanderthal ancestors, according to the Sci-News website. It's a bone fragment from a raven, and it's approximately 38,000 years old. A mere 18 mm long, the bone bears a series of notches that are too evenly spaced to be the result of everyday butchery. Archaeologists believe that two notches on the raven bone could have been made intentionally by Neanderthals to create a pattern meant to be consistent or symbolic. The bone may have worn as a personal ornament, some speculate.
